SUMMARY

An information systems student at Universitas Pembangunan Jaya, interested in software engineering and full stack development with a strong drive to develop leadership skills. Committed to maximizing educational experience and consistently seeking new opportunities for knowledge enhancement. Approaches challenges with an open mind and thirst for learning, fostering personal and professional growth. Believes in creating significant impact in the field of computer science and beyond.

EXPERIENCE

Backend Developer

MP Project

June 2023 - September 2023

- As a Backend Developer using Laravel, I have an important role in the development and maintenance of the server side of web applications.
- One of my main tasks is to design and develop models, controllers, and routes using the features provided by Laravel..

Software Developer

Pembangunan Jaya University

January 2023- May 2023

- During the five-month period at Pembangunan Jaya University's ICT unit, my main tasks involved front-end and back-end development to ensure optimal functionality of the web application being worked on.
- My work experience as a Web Developer Support in Universitas Pembangunan Jaya's ICT unit not only improved my technical skills in handling technical issues, but also strengthened my interpersonal and customer service skills..
